## Professional experience

### **JULY 2013 - NOW**

RUNTIME LLC

ENGINEERING MANAGER / PROJECT MANAGER / SOFTWARE DEVELOPER

I was the one who started a new R&D department from scratch at Runtime LLC. I've been working there as a lead developer and engineering manager for four years.

The first project we developed and deployed into production was an internal Loyalty system for our public travel projects. Since then, we started five new projects, where I am responsible for technical stack, interviewing new candidates, code review, development processes and methodologies chooses.

I am managing five different development teams by now, with at least four members in each team including backend developers, frontend developers and QA.

**Databases and other:** PostgreSQL, Redis, ElasticSearch

**Backend:** Ruby, Rails, Elixir, Phoenix, Hanami

**Frontend:** JS, HTML5, React, jQuery, Websockets, Faye

## **APRIL 2012 - JUNE 2013**

WALLSTR LLC

ENGINEERING MANAGER / RUBY/RAILS SOFTWARE DEVELOPER

Started development team from scratch. Organized the development process including: development methodologies (agile/scrum, code review, planning poker, daily/weekly meetings), set goals and direction vector for the team, releases planning and development strategy.

Integration with different API's providing enterprise services such as ticket search engine, various logistic systems and others.

Business logic and product public API development.

Additional responsibilities included interviewing new candidates and code review.

**Databases and other:** MySQL, PostgreSQL, MongoDB, Memcached, Sphinx

**Backend:** Ruby, Rails, Erlang

**Frontend:** JS, HTML5, Angular, jQuery

## **JUNE 2011 - JUNE 2013**

FOSSLABS LLC

RUBY/RAILS SOFTWARE DEVELOPER

Lead developer at Ruby on Rails department of the company.

Technical stack choices, development of the most complicated parts of the projects, code review, interviewing new candidates.

**Databases and other:** PostgreSQL, MySQL, MongoDB, Redis, ElasticSearch

**Backend:** Ruby, Rails

**Frontend:** JS, HTML5, Angular, jQuery

## **NOVEMBER 2010 - APRIL 2012**

LUXOFT LLC

JAVA/RUBY/RAILS SOFTWARE DEVELOPER

Software development for banking sector (Deutsche bank). Development internal tools for automated statistics aggregation and logs rotation between different bank systems. Worked in team with 10 developers.

**Databases and other:** PostgreSQL, MySQL, MongoDB, Redis, ElasticSearch

**Backend:** Ruby, Rails, Python, Django

**Frontend:** JS, HTML, jQuery

## **JANUARY 2009 - NOVEMBER 2010**

FUJITSU GDC LLC

JAVA/PHP/RUBY/RAILS SOFTWARE DEVELOPER

Enterprise projects maintenance and improvements, development of internal projects and build automating tools scripting for customers like Volvo, Electrolux, GE.

**Databases and other:** PostgreSQL, Oracle

**Backend:** Java, Ruby, Rails

**Frontend:** JS, HTML, Angular, jQuery

## Open Source contribution

### **Some of my open-source projects:**

[https://github.com/maratgaliev/cbr\\_elixir](https://github.com/maratgaliev/cbr_elixir)

[https://github.com/maratgaliev/elixir\\_uber](https://github.com/maratgaliev/elixir_uber)

[https://github.com/maratgaliev/standup\\_bot](https://github.com/maratgaliev/standup_bot)

<https://github.com/maratgaliev/bookmarker>

### **You can find my commits in the following projects:**

Rails, ActiveStorage, Devise Autosigninable, Elixir-mbcs and other.

### **Also I'm one of organizers:**

Kazan Linux User Group (<http://linuxkzn.ru>) and Kazan Elixir Lang User Group (<http://elixirkzn.ru>).

We have already organized five meetups and install fests gathered 50-100 open source enthusiasts.

## Education

Kazan State Agrarian University

Kazan National Research Technical University named after A.N. Tupolev
